# Subject Index

Accidents, radionuclides, analysis, 207
Accrediation, National Measurement Accrediation Service (NMAS), radiochemistry, 331
Accrediation, quality assurance, radiochemical laboratory, National Measurement Accrediation Service (NAMAS), Laboratory of the Government Chemist (LGC), 509
Acid solutions, speciation of chromium, natural waters, low concentrations, sampling procedures, 231
Actinides, gastrointestinal absorption, plutonium, americium, polonium, 429
Actinides, ion exchange, lanthanides, americium, 437
Adsorption, radon, charcoal, Leicestershire, 161
Airborne particulate matter, toxic elements, Thessaloniki, instrumental neutron activation analysis (INAA), 139
Alpha particles, liquid scintillation counting, beta particles, low level counting, glass vials, 297
Alpha spectrometry, thoroium-230, sediement water, thoroium-232, 261
Alpha, beta, X emitters, decomissioning, environment, extraction chromatography, 403
Alpha-emitters, manganese dioxide adsorption, determination, environmental radioactivity, 383
Americium, gastrointestinal absorption, plutonium, polonium, actinides, 429
Americium, ion exchange, lanthanides, actinides, 437
Americium, oxidation state, plutonium, curium, determination, natural waters, 65
Americium, radiochemical analysis, plutonium, curium, food, environment, 177
Americium-241, gamma spectrometry, environmental samples, radiochemistry, well-type detector, 197
Analysis, low-level radionuclides, X-ray spectroscopy, intercomparison, 285
Analysis, radionuclides, accidents, 207
Analytical quality, radiotoxicological monitoring, radioactive measurements, intercomparisons, 73
Anoxic fjord, radionuclides, vertical distribution, water exchange, Chernobyl, reprocessing plant, 1
Aquatic macrophytes, multielement analysis, pollution, trace elements, washing, sample preparation, 109
Atmosphere, plutonium, radioactivity, Chernobyl, 155
Autopsy, polonium, human, bone, 85

Beta counting, quality assurance, intercomparison, gamma spectrometry, 473
Beta particles, liquid scintillation counting, alpha particles, low level counting, glass vials, 297
Biological matrices, tritiated water, determination, liquid scintillation counting, hetero-azetropic distillation, 121
Bone, polonium, human, autopsy, 85

Caesium, contamination, honey, heather plants, transfer, 95
Calibration, quality assurance, ionizing radiation, secondary laboratory, 497
Carbon-14, combustion, environmental, tritium, sulphur-35, 337
Charcoal, radon, adsorption, Leicestershire, 161
Chemical analysis, fly ash, toxic elements, 317
Chemical separation, Chernobyl, radionuclides, speciation, 129
Chemical speciation, suspended matter, uranium, thorium, thorium isotopes, plutonium, 517

Chernobyl derived deposition, natural radiation distribution, 147
Chernobyl, anoxic fjord, radionuclides, vertical distribution, water exchange, reprocessing plant, 1
Chernobyl, plutonium, atmosphere, radioactivity, 155
Chernobyl, radionuclides, speciation, chemical separation, 129
Chloroform, substoichiometric isotope dilution analysis, lanthanum, environmental samples, cupferron, 219
City dumps, thorium, uranium, tin slag, 187
Coal-based carbons, humidity, trapping radioiodine, impregnated carbons, coconut shell-based, 419
Coconut shell-based, humidity, trapping radioiodine, impregnated carbons, coal-based carbons, 419
Coincidence methods, coincidence spectrometry, counting techniques, gamma spectrometry, Ge detectors, radiation detection, 167
Coincidence spectrometry, coincidence methods, counting techniques, gamma spectrometry, Ge detectors, radiation detection, 167
Combustion, environmental, tritium, carbon-14, sulphur-35, 337
Contamination, caesium, honey, heather plants, transfer, 95
Counting techniques, coincidence methods, coincidence spectrometry, gamma spectrometry, Ge detectors, radiation detection, 167
Cupferron, substoichiometric isotope dilution analysis, lanthanum, environmental samples, chloroform, 219
Curium, oxidation state, plutonium, americium, determination, natural waters, 65
Curium, radiochemical analysis, plutonium, americium, food, environment, 177

Decomissioning, alpha, beta, X emitters, environment, extraction chromatography, 403
Delayed neutrons, uranium, environment, 267
Determination, manganese dioxide adsorption, alpha-emitters, environmental radioactivity, 383
Determination, oxidation state, plutonium, americium, curium, natural waters, 65
Determination, radiochemical procedure, speciation, radiocobalt, environmental waters, 237
Determination, tritiated water, biological matrices, liquid scintillation counting, hetero-azetropic distillation, 121
Drinking water, monitoring, uranium, radium, low-background liquid scintillation spectrometry, pulse-shape analysis, 23

Effluent, radionuclides, specification, Sellafield nuclear installation, 51
$\gamma$-Emitters, environmental, radioactivity, intercomparison, $\beta$-emitters, 345
$\beta$-Emitters, environmental, radioactivity, intercomparison, $\gamma$-emitters, 345
Environment, decomissioning, alpha, beta, X emitters, extraction chromatography, 403
Environment, delayed neutrons, uranium, 267
Environment, radiochemical analysis, plutonium, americium, curium, food, 177
Environmental alpha-assay, extractive scintillation, pulse shape analysis, 467
Environmental radioactivity, manganese dioxide adsorption, alpha-emitters, determination, 383
Environmental radon, ground water, 43
Environmental samples, americium-241, gamma spectrometry, radiochemistry, well-type detector, 197
Environmental samples, low level $^{99}$Tc determination, inductively coupled plasma-mass spectrometry, 275
Environmental samples, samarium-151, promethium-147, lanthanoids, radioanaytical method, high pressure liquid chromatography, 305
Environmental samples, substoichiometric isotope dilution analysis, lanthanum, cupferron, chloroform, 219

Environmental waters, radiochemical procedure, determination, speciation, radiocobalt, 237
Environmental, combustion, tritium, carbon-14, sulphur-35, 337
Environmental, radioactivity, intercomparison, $\beta$-emitters, $\gamma$-emitters, 345
EUROMET, spiked reference material, milk, standards, 355
Extraction chromatography, decomissioning, alpha, beta, X emitters, environment, 403
Extraction, silylation, humic substances, size exclusion chromatography, speciation, 359
Extractive scintillation, pulse shape analysis, environmental alpha-assay, 467

Fast analysis, strontium radioisoptoes, liquid scintillation spectrometry, milk, liquid scintillation spectrometry, fast radio-chemical separation, 447
Fast radiochemical separation, strontium radioisoptoes, liquid scintillation spectrometry, fast analysis, milk, liquid scintillation spectrometry, 447
Fly ash, chemical analysis, toxic elements, 317
Food, radiochemical analysis, plutonium, americium, curium, environment, 177

Gamma spectrometry, americium-241, environmental samples, radiochemistry, well-type detector, 197
Gamma spectrometry, coincidence methods, coincidence spectrometry, counting techniques, Ge detectors, radiation detection, 167
Gamma spectrometry, quality assurance, intercomparison, beta counting, 473
Gamma-spectrometry, natural series, uranium-238, protactinium-234m, thorium-234, nuclear data, 393
Gastrointestinal absorption, plutonium, americium, polonium, actinides, 429
Ge detectors, coincidence methods, coincidence spectrometry, counting techniques, gamma spectrometry, radiation detection, 167
Glass vials, liquid scintillation counting, alpha particles, beta particles, low level counting, 297
Ground water, environmental radon, 43

Heather plants, caesium, contamination, honey, transfer, 95
Hetero-azetropic distillation, tritiated water, determination, biological matrices, liquid scintillation counting, 121
High pressure liquid chromatography, samarium-151, promethium-147, lanthanoids, radioanaytical method, environmental samples, 305
Honey, caesium, contamination, heather plants, transfer, 95
Human, polonium, bone, autopsy, 85
Humic acid, radioiodine, soil, uptake, 375
Humic substances, silylation, size exclusion chromatography, extraction, speciation, 359
Humidity, trapping radioiodine, impregnated carbons, coal-based carbons, coconut shell-based, 419

Impregnated carbons, humidity, trapping radioiodine, coal-based carbons, coconut shell-based, 419
Inductively coupled plasma-mass spectrometry, low level $^{99}$Tc determination, environmental samples, 275
Instrumental neutron activation analysis (INAA), toxic elements, airborne particulate matter, Thessaloniki, 139
Intercomparison, analysis, low-level radionuclides, X-ray spectroscopy, 285
Intercomparison, environmental, radioactivity, $\beta$-emitters, $\gamma$-emitters, 345
Intercomparison, quality assurance, gamma spectrometry, beta counting, 473
Intercomparisons, analytical quality, radiotoxicological monitoring, radioactive measurements, 73
Iodine-131, radioecology, sewage sludge, low-energy photo spectrometry, short-lived radionuclides, thallium-201, technetium-99m, 37

Iodine-fulvic complexes, mobility, stability, iodine-humic complexes, sand, 459
Iodine-humic complexes, mobility, stability, iodine-fulvic complexes, sand, 459
Ion exchange, lanthanides, actinides, americium, 437
Ionizing radiation, quality assurance, calibration, secondary laboratory, 497

Laboratory of the Government Chemist (LGC), quality assurance, accrediation, radiochemical laboratory, National Measurement Accrediation Service (NAMAS), 509
Lanthanides, ion exchange, actinides, americium, 437
Lanthanoids, samarium-151, promethium-147, radioanaytical method, environmental samples, high pressure liquid chromatography, 305
Lanthanum, substoichiometric isotope dilution analysis, environmental samples, cupferron, chloroform, 219
Leicestershire, radon, charcoal, adsorption, 161
Liquid scintillation counting, alpha particles, beta particles, low level counting, glass vials, 297
Liquid scintillation counting, tritiated water, determination, biological matrices, hetero-azetropic distillation, 121
Liquid scintillation spectrometry, strontium radioisoptoes, fast analysis, milk, liquid scintillation spectrometry, fast radiochemical separation, 447
Liquid scintillation spectrometry, strontium radioisoptoes, liquid scintillation spectrometry, fast analysis, milk, fast radiochemical separation, 447
Low concentrations, speciation of chromium, natural waters, acid solutions, sampling procedures, 231
Low level $^{99}$Tc determination, environmental samples, inductively coupled plasma-mass spectrometry, 275
Low level counting, liquid scintillation counting, alpha particles, beta particles, glass vials, 297
Low-background liquid scintillation spectrometry, monitoring, uranium, radium, drinking water, pulse-shape analysis, 23
Low-energy photo spectrometry, radioecology, sewage sludge, short-lived radionuclides, thallium-201, iodine-131, technetium-99m, 37
Low-level radionuclides, analysis, X-ray spectroscopy, intercomparison, 285

Manganese dioxide adsorption, alpha-emitters, determination, environmental radioactivity, 383
Milk, spiked reference material, EUROMET, standards, 355
Milk, strontium radioisoptoes, liquid scintillation spectrometry, fast analysis, liquid scintillation spectrometry, fast radiochemical separation, 447
Mineral water, radionuclide, uranium, thorium, radium, 253
Mobility, stability, iodine-humic complexes, iodine-fulvic complexes, sand, 459
Monitoring, uranium, radium, drinking water, low-background liquid scintillation spectrometry, pulse-shape analysis, 23
Multielement analysis, aquatic macrophytes, pollution, trace elements, washing, sample preparation, 109

National Measurement Accrediation Service (NAMAS), quality assurance, accrediation, radiochemical laboratory, Laboratory of the Government Chemist (LGC), 509
National Measurement Accrediation Service (NMAS), accrediation, radiochemistry, 331
Natural radiation distribution, Chernobyl derived deposition, 147
Natural series, uranium-238, gamma-spectrometry, protactinium-234m, thorium-234, nuclear data, 393
Natural waters, oxidation state, plutonium, americium, curium, determination, 65
Natural waters, speciation of chromium,

acid solutions, low concentrations, sampling procedures, 231
Nuclear data, natural series, uranium-238, gamma-spectrometry, protactinium-234m, thorium-234, 393

Oxidation state, plutonium, americium, curium, determination, natural waters, 65

Plutonium, atmosphere, radioactivity, Chernobyl, 155
Plutonium, chemical speciation, suspended matter, uranium, thorium, thorium isotopes, 517
Plutonium, gastrointestinal absorption, americium, polonium, actinides, 429
Plutonium, oxidation state, americium, curium, determination, natural waters, 65
Plutonium, radiochemical analysis, americium, curium, food, environment, 177
Pollution, multielement analysis, aquatic macrophytes, trace elements, washing, sample preparation, 109
Polonium, gastrointestinal absorption, plutonium, americium, actinides, 429
Polonium, human, bone, autopsy, 85
Promethium-147, samarium-151, lanthanoids, radioanaytical method, environmental samples, high pressure liquid chromatography, 305
Protactinium-234m, natural series, uranium-238, gamma-spectrometry, thorium-234, nuclear data, 393
Pulse shape analysis, extractive scintillation, environmental alpha-assay, 467
Pulse-shape analysis, monitoring, uranium, radium, drinking water, low-background liquid scintillation spectrometry, 23

Quality assurance, accrediation, radiochemical laboratory, National Measurement Accrediation Service (NAMAS), Laboratory of the Government Chemist (LGC), 509
Quality assurance, intercomparison, gamma spectrometry, beta counting, 473
Quality assurance, ionizing radiation, calibration, secondary laboratory, 497
Quality control, statistical process control, Total Quality Management (TQM), 485

Radiation detection, coincidence methods, coincidence spectrometry, counting techniques, gamma spectrometry, Ge detectors, 167
Radioactive measurements, analytical quality, radiotoxicological monitoring, intercomparisons, 73
Radioactivity, environmental, intercomparison, $\beta$-emitters, $\gamma$-emitters, 345
Radioactivity, plutonium, atmosphere, Chernobyl, 155
Radioanaytical method, samarium-151, promethium-147, lanthanoids, environmental samples, high pressure liquid chromatography, 305
Radiochemical analysis, plutonium, americium, curium, food, environment, 177
Radiochemical laboratory, quality assurance, accrediation, National Measurement Accrediation Service (NAMAS), Laboratory of the Government Chemist (LGC), 509
Radiochemical procedure, determination, speciation, radiocobalt, environmental waters, 237
Radiochemistry, accrediation, National Measurement Accrediation Service (NMAS), 331
Radiochemistry, americium-241, gamma spectrometry, environmental samples, well-type detector, 197
Radiocobalt, radiochemical procedure, determination, speciation, environmental waters, 237
Radioecology, sewage sludge, low-energy photo spectrometry, short-lived radionuclides, thallium-201, iodine-131, technetium-99m, 37
Radioiodine, humic acid, soil, uptake, 375
Radionuclide, mineral water, uranium, thorium, radium, 253
Radionuclides, analysis, accidents, 207
Radionuclides, anoxic fjord, vertical

distribution, water exchange, Chernobyl, reprocessing plant, 1
Radionuclides, Chernobyl, speciation, chemical separation, 129
Radionuclides, specification, effluent, Sellafield nuclear installation, 51
Radiotoxicological monitoring, analytical quality, radioactive measurements, intercomparisons, 73
Radium, mineral water, radionuclide, uranium, thorium, 253
Radium, monitoring, uranium, drinking water, low-background liquid scintillation spectrometry, pulse-shape analysis, 23
Radon, charcoal, adsorption, Leicestershire, 161
Reprocessing plant, anoxic fjord, radionuclides, vertical distribution, water exchange, Chernobyl, 1

Samarium-151, promethium-147, lanthanoids, radioanaytical method, environmental samples, high pressure liquid chromatography, 305
Sample preparation, multielement analysis, aquatic macrophytes, pollution, trace elements, washing, 109
Sampling procedures, speciation of chromium, natural waters, acid solutions, low concentrations, 231
Sand, mobility, stability, iodine-humic complexes, iodine-fulvic complexes, 459
Secondary laboratory, quality assurance, ionizing radiation, calibration, 497
Sediement water, thoroium-230, alpha spectrometry, thoroium-232, 261
Sellafield nuclear installation, radionuclides, specification, effluent, 51
Sewage sludge, radioecology, low-energy photo spectrometry, short-lived radionuclides, thallium-201, iodine-131, technetium-99m, 37
Short-lived radionuclides, radioecology, sewage sludge, low-energy photo spectrometry, thallium-201, iodine-131, technetium-99m, 37
Silylation, humic substances, size exclusion chromatography, extraction, speciation, 359
Size exclusion chromatography, silylation, humic substances, extraction, speciation, 359
Soil, humic acid, radioiodine, uptake, 375
Speciation of chromium, natural waters, acid solutions, low concentrations, sampling procedures, 231
Speciation, Chernobyl, radionuclides, chemical separation, 129
Speciation, radiochemical procedure, determination, radiocobalt, environmental waters, 237
Speciation, silylation, humic substances, size exclusion chromatography, extraction, 359
Specification, radionuclides, effluent, Sellafield nuclear installation, 51
Spiked reference material, milk, EUROMET, standards, 355
Stability, mobility, iodine-humic complexes, iodine-fulvic complexes, sand, 459
Standards, spiked reference material, milk, EUROMET, 355
Statistical process control, quality control, Total Quality Management (TQM), 485
Strontium radioisoptoes, liquid scintillation spectrometry, fast analysis, milk, liquid scintillation spectrometry, fast radiochemical separation, 447
Substoichiometric isotope dilution analysis, lanthanum, environmental samples, cupferron, chloroform, 219
Sulphur-35, combustion, environmental, tritium, carbon-14, 337
Suspended matter, chemical speciation, uranium, thorium, thorium isotopes, plutonium, 517

Technetium-99m, radioecology, sewage sludge, low-energy photo spectrometry, short-lived radionuclides, thallium-201, iodine-131, 37
Thallium-201, radioecology, sewage sludge, low-energy photo spectrometry, short-lived radionuclides, iodine-131, technetium-99m, 37
Thessaloniki, toxic elements, airborne particulate matter, instrumental neutron activation analysis (INAA), 139

Thorium isotopes, chemical speciation, suspended matter, uranium, thorium, plutonium, 517
Thorium, chemical speciation, suspended matter, uranium, thorium isotopes, plutonium, 517
Thorium, mineral water, radionuclide, uranium, radium, 253
Thorium, uranium, tin slag, city dumps, 187
Thorium-234, natural series, uranium-238, gamma-spectrometry, protactinium-234m, nuclear data, 393
Thoroium-230, alpha spectrometry, sediement water, thoroium-232, 261
Thoroium-232, thoroium-230, alpha spectrometry, sediement water, 261
Tin slag, thorium, uranium, city dumps, 187
Total Quality Management (TQM), quality control, statistical process control, 485
Toxic elements, airborne particulate matter, Thessaloniki, instrumental neutron activation analysis (INAA), 139
Toxic elements, fly ash, chemical analysis, 317
Trace elements, multielement analysis, aquatic macrophytes, pollution, washing, sample preparation, 109
Transfer, caesium, contamination, honey, heather plants, 95
Trapping radioiodine, humidity, impregnated carbons, coal-based carbons, coconut shell-based, 419
Tritiated water, determination, biological matrices, liquid scintillation counting, hetero-azetropic distillation, 121
Tritium, combustion, environmental, carbon-14, sulphur-35, 337

Uptake, humic acid, radioiodine, soil, 375
Uranium, chemical speciation, suspended matter, thorium, thorium isotopes, plutonium, 517
Uranium, delayed neutrons, environment, 267
Uranium, mineral water, radionuclide, thorium, radium, 253
Uranium, monitoring, radium, drinking water, low-background liquid scintillation spectrometry, pulse-shape analysis, 23
Uranium, thorium, tin slag, city dumps, 187
Uranium-238, natural series, gamma-spectrometry, protactinium-234m, thorium-234, nuclear data, 393

Vertical distribution, anoxic fjord, radionuclides, water exchange, Chernobyl, reprocessing plant, 1

Washing, multielement analysis, aquatic macrophytes, pollution, trace elements, sample preparation, 109
Water exchange, anoxic fjord, radionuclides, vertical distribution, Chernobyl, reprocessing plant, 1
Well-type detector, americium-241, gamma spectrometry, environmental samples, radiochemistry, 197

X-ray spectroscopy, analysis, low-level radionuclides, intercomparison, 285
